

Comments on PRC Docket N2021-1

June 5, 2021

To the Postal Regulatory Commission:

I am not associated with the US Postal System; just a US citizen who relies heavily on the Postal Service. I am writing in strong opposition to the proposed changes to our US Postal System under PRC Docket N2021-1. These changes would not give service and standards we deserve, we deserve exceptional postal service!

The US Postal System wasn't set up to make a profit but to ensure all US citizens have the same access to mail service regardless of where they live and who they are.

I am opposed to the proposed service standard changes which would permanently slow down the delivery of much of our mail. The US Postal System's focus should be on improving the delays that have plagued the service in the past year, not making a profit.

All the money / profit woes began in 2006 when Congress mandated that US Postal System do something no other U.S. entity, public or private, is required to do: pre-fund future retiree health benefits decades into the future. The 10-year plan that is proposed will not even address the real profitability issue but will create a death spiral. Work on rectifying this issue.

I believe in Universal US Postal Service and the healthy survival of a public agency the people of this country have come to rely upon.

Yours truly,
